KEYNOTE AND ALL-MEMBER MEETING

Presenter(s): Jim Tressel

Session Date/Time: 11/30/2023 9:00:00 AM - 11/30/2023 10:30:00 AM

Location: Zambezi Ballroom

POSTER PRESENTATION: THE IMPACT OF BURNOUT SYMPTOMS ON ADAPTED PHYSICAL EDUCATION SPECIALISTS' TEACHING EXPERIENCES

Presenter(s): *Mariah Clay, The Ohio State University*

Session Date/Time: 11/30/2023 9:00:00 AM - 12/1/2023 1:00:00 PM

Location: Exhibit Hall

Session Description: Adapted physical education (APE) specialists play a critical role in promoting physical activity and education for students with disabilities. However, the demanding roles and responsibilities of the profession can place APE specialists at risk of experiencing burnout symptoms, which can significantly impact or influence their teaching experiences. Findings from a literature review found that APE specialists have experienced excessive caseloads (Obsrunskova & Kelly, 2009), poor work conditions (Kudláček et al., 2008), and job dissatisfaction and stress (Wilson et al., 2020). However, several weaknesses appeared through the literature review, such as burnout research pertained to general classroom teachers (Guestems-Carnicer et al., 2019) and how literature findings grouped APE specialists with non-core subject teachers (Richards et al., 2018). Therefore, the purpose of this study was to explore how burnout symptoms (perceived high and low levels) influence adapted physical education (APE) specialists' teaching experiences. A descriptive-qualitative study was used and situated in the role socialization theory. The participants were seven APE specialists employed in the Columbus City School District in Central Ohio. A quantitative component was used to measure the APE specialists' experiences of burnout symptoms while teaching. The data collection instruments used in this study included: fieldnotes generated during nonparticipant observations from lessons, three semi-structured interviews with each APE specialist, and a demographic questionnaire. Lastly, triangulation, member checking, memoing, and peer debriefing were used to establish trustworthiness with a thematic analysis approach for the data analysis (Braun & Clarke, 2006). In conclusion, there was of critical importance to address burnout symptoms that influenced APE specialists' teaching

experiences because these specialists ultimately enhance and improve the quality of PE for students with disabilities.

POSTER PRESENTATION: PRE-SERVICE TEACHERS' VOICES ABOUT LEARNING THROUGH A PRACTICE-BASED TEACHER EDUCATION APPROACH

Presenter(s): *Insook Kim, Kent State University*

Idowu Adekabi, Kent State University

Session Date/Time: 11/30/2023 9:00:00 AM - 12/1/2023 1:00:00 PM

Location: Exhibit Hall

Session Description: Practice-based teacher education (PBTE) is a movement designed to align the education of pre-service teachers (PSTs) with the task demands of teaching (Brownell, Ross, Colon, & McCallum, 2005). PBTE asks teacher educators to engage in processes that provide legitimate and authentic experiences to pre-service teachers. Teaching rehearsals and repeated teaching are two common pedagogies used in PBTE. Teaching rehearsals for specific lessons, content, and contexts involve peer teaching and provide experience for the PST as a teacher and as an observational learner in the role of a student. PSTs can reflect on and make sense of their experiences during the teaching rehearsals. Repeated teaching of the same lesson allows PSTs to understand the nuances of lessons and change their lesson based on past teaching experiences, reflection, and in-the-moment decision-making or adaptation. The central focus of PBTE is considering transferable knowledge and skills that PSTs must acquire in their teacher training. In this presentation, we will share the qualitative study results that explored PSTs' perspectives and experiences learning through these essential PBTE pedagogies in their physical education teacher education program.

IMMERSIVE CLASSROOM USING AI

Presenter(s): *Alex Myers, Marietta City Schools*

Session Date/Time: 11/30/2023 10:45:00 AM - 11/30/2023 11:30:00 AM

Location: Kalahari Salon D

Session Description: Looking at the advancements of AI today, how can we use it to create a more immersive classroom experience? We will look at the tools currently available and how they can be used to create a fun and interactive experience for the students in your classroom with minimal effort by the instructor.

UNIFIED SPORTS -THE NEXT STEP IN ADAPTIVE PE!

Presenter(s): *Ty-Ann Gray, Woodridge Local School District*

Theresa Novak, Woodridge Local School District

Session Date/Time: 11/30/2023 10:45:00 AM - 11/30/2023 11:30:00 AM

Location: Kalahari Salons E&F

Session Description: Unified Sports -The next step in Adaptive PE! What is it? How does it work? What are the opportunities for all members of your district? During this session participants will learn how Woodridge has structured the district's Unified programs, and Unified PE at the high school level. The group will explore the

opportunities available at the middle school and elementary levels for Unified programs, and discuss the possibilities, logistics and class management. Currently the role of high school aged students with multiple disabilities resides in the words "needs help." The vision and goal of this program is to facilitate the expansion of those roles reserved for students with multiple disabilities. Unified PE promotes student partnerships with special education (athletes) and general education (partner athletes) to see value in everybody's membership through team activities/sports. So, how do we shift the idea that students with multiple disabilities always "needs help", and can only be on the sidelines as honorary members of teams, to members that are equal to that of their peers? The idea shifts by creating an inclusive program where special education and general education both have equal membership in their class and earn the same high school graduation credit. Come join us, and don't miss your opportunity to shift from integration to inclusion!

SENDING A MESSAGE: ADVOCACY FOR HEALTH EDUCATION, PHYSICAL EDUCATION, AND THE WHOLE CHILD

Presenter(s): *Kevin Lorson, Wright State University*

Session Date/Time: 11/30/2023 10:45:00 AM - 11/30/2023 11:30:00 AM

Location: Kalahari Salon C

Session Description: This presentation highlights national, state, and local advocacy efforts to promote health, physical literacy, and the whole child. Advocacy includes navigating the legislative process; joining forces with stakeholders to develop legislation or articulate a coordinated response to legislation negatively impacting teachers and students; and constructing resources to support implementation of laws/requirements. We will also discuss local advocacy activities that support quality health education and physical education as well as alignment with the Ohio Whole Child Framework.

OUTDOOR ADVENTURES FOR ELEMENTARY STUDENTS!

Presenter(s): *Scot McClure, Outdoors Tomorrow Foundation*

Session Date/Time: 11/30/2023 10:45:00 AM - 11/30/2023 11:30:00 AM

Location: Kilimanjaro Suite 5

Session Description: Did you get interested in a specific activity when you were in elementary school that you still love today? You can do the same for your students! Introduce your K-5th grade students to valuable lifelong outdoor activities. Learn how to include hiking, camping, orienteering, fishing, archery, survival skill, paddling and wildlife conservation into your yearly units. Come and learn simple and easy lessons that will make a huge impact on your students and help you meet the outdoor components for outdoor skills/pursuits.

Who's hungry? What do we eat on a camping trip? How do we cook it? What do we use?

Where do we store it? How do we make a campfire safely? All these questions and more are answered through games and activities for classes big and small!

How many students have never caught a fish? Give them the opportunity to learn the basics of casting & fishing right at school. See how excited your students are when they catch a backyard bass in the gym or on the lawn of your school.

Come and check out new activities to enhance your already GREAT PE program!

TEE UP THE BALL: TEACHING FUNDAMENTAL GOLF SKILLS IN SCHOOL PHYSICAL EDUCATION

Presenter(s): *Insook Kim, Kent State University*

Doug Ellison, Kent State University

Idowu Adekanbi, Kent State University

Session Date/Time: 11/30/2023 10:45:00 AM - 11/30/2023 11:30:00 AM

Location: Kilimanjaro Suite 3

Session Description: Golf is one of the popular recreational sports played and enjoyed by many people in the United States, so schools have started to include it in their physical education curriculum. However, pre-service and in-service teachers need to be well-trained to develop strong content knowledge for teaching fundamental golf skills and play rules in schools due to a lack of teaching resources that fit into the school settings. We will present teaching resources for enhancing pre-service and in-service physical education teachers' common content knowledge for performing and teaching golf games and skills in school physical education using a developed content knowledge packet that includes facility and equipment lists, the game rules, etiquette and safety rules, and the critical elements of swing techniques.

MAXIMIZING THE FEELING GOOD EXPERIENCE IN EXERCISE AND SPORT: KEY CONSIDERATIONS FOR LIFETIME PARTICIPATION

Presenter(s): *Bonnie Berger, Bowling Green State University*

Adrian Turner, Bowling Green State University

Robert Stadulis, Kent State University

Mary Jo MacCracken, University of Akron

Session Date/Time: 11/30/2023 10:45:00 AM - 11/30/2023 11:30:00 AM

Location: Kalahari Salon G

Session Description: Feeling good when exercising and participating in sport activities brings the participants back for more. Thus, the feeling good experience facilitates participation in exercise and sport on a frequent basis and throughout one's lifetime. Many participants return to exercise and sport in search of mood alteration, improved performance, self-esteem, and inclusion for all interested participants. Bonnie Berger will present exercise and sport characteristics that facilitate desirable changes in mood and the feeling good sensation. These characteristics include exercise intensity, duration, and frequency as well as the intensity of competition and changes in breathing patterns. Adrian Turner will explore the role of interpersonal competition and the influence of winning and losing, as well as quality of performance on the feeling good phenomena in young athletes. Bob Stadulis will focus on the role of physical activity in improving participants' self-esteem. By improving self-esteem, participants will have more confidence and will experience feeling good about their movement skills. Finally, Mary Jo MacCracken will share the latest research on reducing excuses for exercise (Excusercising) which will help students overcome excuses and will enable them to engage in habitual, enjoyable exercise. This session concludes with an opportunity for members of the audience to share personal examples of maximizing the feeling good sensations when participating in exercise and sport.

ADVENTURE BASED LEARNING AND SOCIAL EMOTIONAL LEARNING: WHY, HOW, AND ACTIVITIES!

Presenter(s): *Sam Meyerhoff, Ohio State University*
Sue Sutherland, Ohio State University
Ohio State Undergraduate Students, Ohio State University

Session Date/Time: 11/30/2023 1:30:00 PM - 11/30/2023 2:15:00 PM
Location: Kilimanjaro Suite 3

Session Description: Social Emotional Learning has been a recent focus for educators. While Adventure Based Learning is a well known but underutilized teaching model. Adventure Based Learning (ABL) is flexible and adaptable for different environments, settings, and abilities in physical education. With ABL, physical educators facilitate students through five stages; getting to know each other, communication, cooperation, trust, and problem solving to build interpersonal and intrapersonal skills. Social Emotional Learning's five components; self-awareness, self-management, social awareness, relationship skills, and responsible decision-making are infused throughout ABL activities and experiences. The combination of sequenced activities and debrief discussions provide an enriching experience to students. Come and learn how ABL and SEL can enhance and broaden your physical education classes.

REDUCING STIGMA & PROMOTING STRENGTH IN HEALTH EDUCATION

Presenter(s): *Kevin Lorson, Wright State University*
Tina Dake, Washington Local Schools

Session Date/Time: 11/30/2023 1:30:00 PM - 11/30/2023 2:30:00 PM
Location: Kalahari Salon A

Session Description: Stigma is a negative stereotype of mental illness and substance use disorder that occurs when someone is seen in a negative way because of his, her or their behavioral health condition. This session will highlight how we can reduce stigma in our health education curriculum. The session will give examples of lessons and learning activities to shape our vocabulary, actions, and curriculum. Reducing stigma can create hope and help our students, families, and people we care about reach out and seek resources, support, and treatment for behavioral health conditions.

KEY INDICATORS TO MINIMIZE INJURY AND ILLNESS IN DISTANCE RUNNERS

Presenter(s): *Kitty Consolo, Ohio University Zanesville*

Session Date/Time: 11/30/2023 1:30:00 PM - 11/30/2023 2:15:00 PM
Location: Kalahari Salon C

Session Description: Key Indicators to Minimize Injury and Illness in Distance Runners
By Kitty A Consolo, PhD
Ohio University Zanesville

The purpose of this presentation is to educate both coaches and distance runners on recognizing key indicators that can help minimize injury and illness in distance runners. Being able to train distance runners without incurring injury and experiencing illness can be a daunting task, given individual differences and the wear and tear of distance running on the body. Runners that are new to distance running are especially vulnerable to injury and illness due to their lack of experience and training. By being aware of specific indicators, distance

runners and their coaches can better achieve a proper balance between training and straining and thereby have a greater chance of staying healthy and being successful.

Through science-based research and 48 years of competing in distance running (currently top senior runner), the presenter will provide guidelines for recognizing early warning signs and implementing practices to minimize the occurrence of injury and illness. Three key main indicators are pain, tightness, and fatigue both during and after running. A scale will be provided for each of these indicators as well as subtle indices so both runners and coaches know when to stop running, ease up and what actions to take. Methods to measure and monitor other indicators that can affect pain, tightness, and fatigue such as hydration status, heat illness and hyponatremia as well as use of resting heart rate to utilize signs of over training will be provided as well.

IMPROVING MENTAL STRATEGIES FOR ATHLETIC PERFORMANCE

Presenter(s): *Kylee Ault-Baker, LiFEsports at The Ohio State University*
Dawn Anderson-Butcher, LiFEsports at The Ohio State University

Session Date/Time: 11/30/2023 1:30:00 PM - 11/30/2023 2:15:00 PM

Location: Kilimanjaro Suite 4

Session Description: Coach Beyond, in partnership with the Ohio High School Athletic Association, is working to change the landscape of coach training in Ohio. Coach Beyond is a series of coach education sessions, tools and resources designed to ensure Ohio's coaches and educators are ready to "coach beyond..." This training on Improving Mental Strategies for Athletic Performance is designed to help coaches and educators recognize the impact of performance anxiety on athletic performance and learn strategies that prepare students and athletes for peak performance. Participants attending this training will engage in an interactive activity to reflect on the impact

of performance anxiety and discuss strategies to mitigate risks and promote resilience. In addition, presenters will share behavioral, cognitive, and environmental strategies shown to enhance athletic performance. A myriad of videos from renowned coaches and sport leaders are utilized to allow for learning and reflection during this training. Participants in attendance will: (a) Recognize the impact of performance anxiety and stress on athletic performance; (b) Gain knowledge of factors that contribute to elevated anxiety; (c) Explore behavioral, cognitive, and environmental strategies that enhance athletic performance; and, (d) Discuss ways to implement mental strategies into routines, games, and practices.

A DIFFERENT WAY TO PLAY

Presenter(s): *Melissa Dreisbach, The University of Akron*

Lara Roketenetz, The University of Akron

Joe Trego, The University of Akron

Dan Heideman, Akron Public School

Dale Landenberger, Akron Public School

Session Date/Time: 11/30/2023 1:30:00 PM - 11/30/2023 2:15:00 PM

Location: Kalahari Salons E&F

Session Description: Finding ways to create community collaborations in higher education can be a challenge. Finding connections for the special needs population for enrichment can be a challenge as well. The University of Akron and Akron Public Schools Adapted Physical Education division found a way to pull resources and offer a collaboration that was equally beneficial for all parties involved.

The University of Akron's School of Exercise and Nutrition Sciences (SENS) and School of Biology's Field Station (UAFS) collaborated to create a community outreach with the students from the Adapted Physical Education classes at Akron Public Schools (APS). In the first outreach, APS students took part in a unique experience hosted at the UAFS for various activities that helped to formulate a positive understanding for nature, art, and physical activity. The purpose of this collaboration was to introduce the APS students to environmental education using physical activities and art. Students learned about nature and science concepts using nature hikes, unique physical activities, interactive story book trails, socializing and art projects. Many of the experiences were physical in nature but also included the senses, creativity, and critical thinking skills.

The second outreach took the form as an "UnClass" university course. The purpose of this course was to introduce UA students to the special needs' population from APS. UA Students worked in small groups to create physical activities for their special need "Friends" to participate. The varies activities were used as a vehicle to interact and learn from each other .

The overall objective for both outreaches was to benefit physically, socially, and emotionally. Not only did the students learn how to accommodate and be comfortable with this population, but they also began to appreciate the differences and similarities they possessed.

Session Description: Coach Beyond, in partnership with the Ohio High School Athletic Association, is working to change the landscape of coach training in Ohio. Coach Beyond is a series of coach education sessions, tools and resources designed to ensure Ohio's coaches are ready to "coach beyond..." This training on Supporting Student-Athlete Mental Health is designed to increase awareness of common signs and symptoms of mental health concerns among student-athletes. In addition, participants attending this training learn practical strategies to integrate into their daily practices and resources to link and refer student-athletes to mental health support in their schools and communities. Our first learning objective is achieved by sharing knowledge on the underlying causes of mental health concerns and the effects of stress and trauma on athletes. Then, through a guided and interactive discussion, participants examine how common signs and symptoms may emerge among the athlete population or young students in schools. Next, presenters share practical techniques that coaches, educators, and school leaders can utilize to support student-athlete mental health at practice, off the field, and during competitions. One technique includes using the "Q.P.R." approach. Q.P.R. stands for question, pause/persuade,

and refer. Participants learn to ask open-ended questions, pause to actively listen, and persuade a student-athlete to seek additional support. This session concludes with a conversation about identifying linkage and referral opportunities to mental health clinicians or services in one's school or community. To date, 88% of coaches who have participated in this training reported gaining knowledge, awareness, or skills related to supporting student-athlete mental health.

STRATEGIES FOR DESIGNING SUBSTANCE ABUSE PREVENTION MESSAGES

Presenter(s): *Tavis Glassman, The University of Toledo*
Aubrey Whewell, The University of Toledo

Session Date/Time: 11/30/2023 3:45:00 PM - 11/30/2023 4:30:00 PM

Location: Kalahari Salon A

Session Description: Looking for cost-effective strategies to address substance abuse at your school? Come to this session and learn how to design evidence-based prevention messages and how to assess them. Messages addressing opiate use, cannabis, drunkorexia, drug and alcohol interactions, and others will be shown. Suggestions for recruiting research participants and how to utilize students to help design messages will be explored. Formative, process, and summative evaluation strategies are discussed in a user-friendly manner. Within the

presentation, a discussion on how to prioritize audiences and design inclusive messages will be examined. Do's and don'ts associated with health communication will be presented. This session is geared toward researchers, practitioners, teachers, and students!

Learning objectives for this presentation include:

- o Analyze previously implemented messages
- o Discuss how to use students.
- o Describe how to determine if a message is effective.

FOSTERING A POSITIVE TEAM ENVIRONMENT

Presenter(s): *Sydney Mack, LiFEsports at The Ohio State University*

Samantha Bates, LiFEsports at The Ohio State University

Dawn Anderson-Butcher, LiFEsports at The Ohio State University

Session Date/Time: 12/1/2023 8:45:00 AM - 12/1/2023 9:30:00 AM

Location: Cypress

Session Description: Coach Beyond, in partnership with the Ohio High School Athletic Association, is working to change the landscape of coach training in Ohio. Coach Beyond is a series of coach education sessions, tools, and resources designed to ensure Ohio's coaches and educators are ready to "coach beyond..." This training on Fostering a Positive Team Environment is designed to help coaches and educators understand factors that influence team dynamics and enhance their ability to build trust and promote belonging among team members. Participants attending this training will learn strategies to build trust and then engage in a gamified and discussion-based activity focused on fostering positive team dynamics. Coaches and educators will leave having engaged in peer discussion about effective strategies that enhance relationships among student-athletes and improve the coach-athlete relationship. This discussion takes place while coaches and educators play the game of "T.R.I.-ing" (i.e., Trust, Relationship-building, and Inclusion). In the game, participants reflect on coach behaviors and sport events that establish or erode trust, relationships, or a team's inclusive culture. By answering questions and reflecting on their behaviors and events, coaches and educators progress through the game, and a player wins by "T.R.I.-ing" their best to cultivate a positive youth sport environment. The game of "T-R-I-Ing" aims to allow participants to (a) Recognize behaviors that support the holistic health and development of student-athletes; (b) Explore common strategies that build trust and foster belonging among team members; (c) Understand factors that influence team culture and trust throughout an athletic season; and (d) Reflect and share strategies that coaches and educators can use to foster a positive team culture.

PE AND OUR LITTLEST LEARNERS

Presenter(s): *Stacey Slackford-Barnes, Aurora City Schools*
Lauren Wilson, Twinsburg City Schools

Session Date/Time: 12/1/2023 10:15:00 AM - 12/1/2023 11:00:00 AM

Location: Kilimanjaro Suite 2

Session Description: Calling all elementary physical education teachers... do you struggle managing and teaching our littlest learners (Preschool; PreK; Kindergarten) in PE? Please join us for a hands-on session which will focus on

management strategies, basic PE curriculum ideas, along with fun and interactive activities and games for our little learners. We will also demonstrate how to construct and use a visual schedule. A visual schedule helps children anticipate changes and reduces anxiety by showing them what activities are planned for PE. Furthermore, visual schedules foster independence by allowing students to know what will take place next in PE. We will share lesson ideas that have been successful in our PE classes, along with ideas on how to adapt lessons for IEP students. We would LOVE for you to bring some ideas of your own to share with others as well. If you teach our littlest learners, you won't want to miss this!

BACK TO THE BASICS WITH CLASSROOM MANAGEMENT

Presenter(s): *LaTrice Shields, Cleveland Metropolitan School District*

Session Date/Time: 12/1/2023 11:15:00 AM - 12/1/2023 12:00:00 PM

Location: Kilimanjaro Suite 2

Session Description: More than ever before you must approach your teaching with new ideas and continued enthusiasm about some of your old strategies. What happens on the first days of school can be a strong indicator of your success for the year, what happens in the first minutes of your class can indicate your success for the rest of the class period. To be effective, it requires a well-planned and well-organized learning environment. The strategies you use to implement your program are based on your philosophy, your objectives, and the children you teach. In this session the activities I will present will provide you with effective, challenging and enjoyable learning opportunities while teaching important components and principles of classroom management strategies.

ONLINE TOOLS TO SUPPORT OFFLINE HEALTH

Presenter(s): *Jonathan Barnes, EVERFI*

Session Date/Time: 12/1/2023 11:15:00 AM - 12/1/2023 12:00:00 PM

Location: Kalahari Salon A

Session Description: Fostering a healthy school environment is a challenge and student needs are growing more diverse every year; from the need to structure a healthy balance of screen time and activity to talking about the dangers of vaping and the need for mental health support. Fortunately, EVERFI is here to help with a wide variety of no-cost resources that can diversify your classroom experience and provide needed instruction and interaction with students at all levels.

Our online programs and lessons provide students with a low-risk environment to learn about addiction and how it can impact their lives physically and socially, while equipping them with concrete skills to advocate for their own health and wellness. Whether you're working to educate students about how to build healthy eating and exercise habits, the dangers of alcohol or prescription drug abuse, or navigating conflict in social situations, EVERFI has a growing library of interactive, online programs to support the health and wellness of your school community. During our session, educators will gain access to our entire catalog of no-cost resources, learn best practices for use with students, and get a sneak peak at what's new for the 23-24 school year.

REINDEER GAMES

Presenter(s): *Pat Hetrick, Bowling Green City Schools Conneaut Elementary*
Jeremy Koehler, Bowling Green City Schools Conneaut Elementary

Session Date/Time: 12/1/2023 12:15:00 PM - 12/1/2023 1:00:00 PM

Location: Kilimanjaro Suite 3

Session Description: Various games, activities, competitions to be played during Christmas week at the elementary school level. This is a great way to end the first half of the school year, much like Field Day is to end a school year. The games are easy to learn and fun to play with themes centered around Santa's Reindeer. Games can be played by individual classes or by whole grade levels. Even though the games are simple, there is plenty of competition to make this a worthy event for your school. Games are for all ages and can be adjusted for each grade level. We will show you 6-8 games, provide a to do list and a list of materials needed along with written summaries of each game. Make it what you want or use what we have to offer.

"FUN-DAMENTALLY" FIT WITH OPEN PHYSED! MIDDLE SCHOOL/HIGH SCHOOL: GRADES 6-12

Presenter(s): *Margaret Robelee, OPEN - Online Physical Education Network*

Session Date/Time: 12/1/2023 12:15:00 PM - 12/1/2023 1:30:00 PM
Location: Kilimanjaro Suite 4

Session Description: Fitness can be FUN! Join us to explore and learn about the fantastic fitness activities and free resources for students in grades 6-12 from OPEN Phys Ed! Participants will learn how to maximize activity time, teach fitness concepts, add academic language, and assess using a variety of modules such as Plug and Play Fitness, Tabata Training, Tools for Teaching Health and Wellness and more. Come ready to move and learn together during this action-packed session!

During this session, participants will be introduced to activity plans and resources from OPEN to support the incorporation of physical fitness into Middle School and High School Physical Education programs. The OPEN website will be shared, along with academic language cards, assessment tools and other resources necessary for implementation. Participants will be encouraged to actively participate in lessons from various OPEN modules that highlight physical fitness.

SUPERCARGE MOVEMENT LEARNING AND ASSESSMENT WITH THE MIND BODY CONNECTION USED BY PHYSICAL THERAPISTS

Presenter(s): *Caroline Humberston, Playtime Movement*

Session Date/Time: 12/1/2023 12:15:00 PM - 12/1/2023 1:00:00 PM

Location: Kalahari Salon D

Session Description: As a teacher, you have an immense impact on your students' lives. One of the ways you can promote your skills as a teacher is by using quantitative skill assessments. By assessing your students' movement skills systematically, you can identify areas that need improvement and provide targeted teaching to meet their needs. Promoting the mind-body connection by teaching them movements can help your students build strong, healthy bodies, which will serve them well into adulthood.

It is essential to encourage your students to focus on their progress rather than their shortcomings. Providing them with constructive feedback and support can help them develop a sense of mastery and accomplishment. This approach can inspire them to make healthy choices throughout their lives, potentially avoiding future back surgeries and knee replacements.

You don't have to make these assessments and movement learning techniques boring or intimidating. In fact, these techniques have been proven useful in physical therapy clinics promoting mind-body connections. By using proven assessments and movement learning techniques, you can help your students develop a positive attitude towards movement and physical activity through confidence-building tasks. Remember, your students' success is your success!
